amazon

FEATURES & BENEFITS

1 EASY INSTALLATION

Using Liquid Nails or a similar panel adhesive, simply apply the pre-grooved base trim to the wall, slip in the pre-cut planking, and complete by applying the pre-grooved decorative chair rail.

2 MOISTURE RESISTANT

PVC material is 100% mold and rot resistant- ensuring a beautiful interior for years to come. Additionally, the trim kit base moulding comes with a rubber piece on the top to prevent any water from seeping between the wall and the planks.

3 REVERSIBLE

Our 3 ft. and 8ft. planking offer a design selection- 3 narrow planks (2.36 in. wide per plank) on one side of the panel and two large planks (3.54 in. wide per plank) on the other.

4 TRIMMABLE

Our 8 ft. (96 in.) planking can be trimmed for use as wainscot (34 or 48 in.) or cut to any desired length.

5 HIGH SAFETY RATINGS

A safe addition to the home, this wainscoting product meets the ASTM E84 Class A rating.

Interior use only, non-commercial grade

6 NATURALLY INSECT RESISTANT

Composite material avoids the risk of insect damage that accompanies a wood alternative.

7 DURABLE AND LOW MAINTENANCE

Easily wipes clean with a damp cloth.

8 PRE-FINISHED

All panels and moulding come pre-finished as is and no additional work is needed. *Plastpro Reversible Wall Paneling is a vinyl product. Paint selection should be based on the paint manufacturer's recommendations and instructions for coating vinyl products*
